## Discover the power of 60GHz with Westbase.io and Cambium Networks.

Join us for an exclusive partner workshop focused on unlocking the full potential of 60GHz technology.

This high-impact, half-day session will explore how multi-gigabit wireless is redefining the way AltNets, neutral hosts, WISPs, and MSPs design and deploy modern networks.

### What to expect

Delivered in a flexible hybrid format – hosted at your premises or ours – the session blends in-person engagement with expert-led technical content:

#### Lunch & learn

- | Kick things off with a casual networking lunch, on us. Our team will walk you through the session goals and provide a quick refresher on Cambium's 60GHz portfolio – setting the stage for what's to come.

#### Technical deep dive

- | Led virtually by Cambium's 60GHz specialists, this session covers cnWave solution design, LINKPlanner planning, and network optimisation. A live lab follows, featuring deployment demos, diagnostics, and troubleshooting – with on-site support from the team.

Whether you're scaling your wireless network or seeking a fibre-fast alternative, this workshop will equip you with the insight and confidence to deliver.
